# ADMISSION.

---

1. Applicants for admission must furnish evidence of good moral character, and produce a certificate of honorable dismissal from the Institution of which they last were members.

2. No one will be admitted, who shall fail, without reasonable excuse, to report himself to some member of the Faculty within twenty-four hours after his arrival in Town.

3. Candidates for admission to the Freshman Class, must sustain a creditable examination in the Common English Branches, Latin and Greek Grammars, Cæsar, Virgil, Sallust or Cicero's Select Orations, the Greek Reader, and Davies' Elementary Algebra through Equations of the first degree, or what shall be equivalent thereto. The requirements for admission to the first year of the Scientific Course are the same as the above, excepting the Greek and Sallust or Cicero. For admission to advanced standing, candidates must sustain an examination on all the studies previously pursued by the class they propose to enter.

4. No one will be admitted to the Freshman Class until he has completed his fourteenth year, nor to advanced standing, without a proportionate increase in age.

5. Students are admitted to pursue an irregular course, when in the judgment of the Faculty it may be advisable. Such students, however, are required to take a sufficient number of studies to occupy their time profitably, and recite in such regular classes as they are qualified to enter.

6. The attention of Parents, Teachers, and Candidates for admission is called to the fact that the courses of study are elevated, and that thorough preparation and a good degree of previous mental discipline is necessary, in order to pursue them with success.

## THEOLOGICAL COURSE.

To those who have completed a College course, or such literary studies as may have qualified them to receive it, instruction will be given in such a course of Theological studies as is usually pursued in Theological Seminaries, occupying three years. All others are expected to pursue either the Classical or Scientific course in preparation for the Theological, except that those whose circumstances demand it, are permitted to pursue a shorter course in Theology, as follows:

1. Ecclesiastical History.
2. In Systematic Theology.

1. Natural Religion; 2, Evidences of Revealed Religion; 3, The Trinity; 4, The Purposes of God, Election, &c.; 5, Moral Accountability, Natural and Moral Ability; 6, Man as a Sinner, The Fall, Depravity;

7, Salvation by Grace; The Covenant of Redemption; Atonement; Regeneration; Justification by Faith; Perseverance of the Saints; 8, Resurrection; Future Rewards and Punishment; 9, The Church; Baptism, Communion, Officers and Discipline of the Church; Preparation of Plans and Criticism of Sermons; Pastoral Duties.

All Theological students have throughout their course an exercise in the Preparation of Plans and Criticism of Sermons.

---

## APPARATUS, &c.

---

The means of instruction are abundant. The Department of Mathematics is supplied with a good Theodolite, Compass, Chain, Level, Levelling Staves, &c. In Surveying, the student is familiarized with the use of Instruments and Field Practice.

The Philosophical Apparatus comprises all that is requisite for illustration. Throughout the course of Natural Philosophy pursued by the Junior Class, experiments are performed in connection with the daily recitation from the text-book. By this means, each branch of the subject is copiously illustrated, and the valuable apparatus continually furnishes important aid to the student.

The Astronomical Apparatus consists of a good Telescope, Orrery, Globes, Circle, Transit, and all other such instruments as are useful to the student of the Elements of Astronomy. These are freely used throughout the course. Instruction is also given in the Geography of the Heavens.

The Chemical department possesses ample means for exhibiting all the experiments indicated in the text-books. In addition, many others are performed illustrating the higher branches of the science. Agricultural Chemistry receives a large share of attention, and no pains are spared to give the student a clear insight into the truths upon which this important branch of chemical science is based. The Chemicals and Chemical Apparatus have received valuable additions during the past year.

Mineralogy is taught in connection with Chemistry so as to acquaint the student with the crystalline forms, and the chemical constitution and classification of minerals. The Senior Class is introduced to the science of Botany by a series of familiar class lectures upon the physical con-

stitution and classification of plants, accompanied by numerous illustrations.

The Cabinet contains a complete series of Minerals and Geological specimens, by which the resources and formations of our own State, and of other sections of the country, may be fully illustrated.

A series of Public Lectures is delivered each session, upon some branch of science, and the subjects selected are more fully developed, than the usual methods of instruction admit.

---

## THE SUB-FRESHMAN CLASS.

---

This class is made up of those who are preparing to enter upon the Classical or Scientific course. Attention is invited to the fact that they enjoy the instruction of the Professors and Tutors in College, and that their studies are directed with especial reference to the course upon which they propose to enter.

---

## PREPARATORY DEPARTMENT.

---

Pupils are received into this Department at any stage of advancement, and the following Text-books are used, viz:

Weld's English Grammar;—Mitchell's Geography;—Thompson's Arithmetic; Davies' Algebra; Willard's History of the United States; Ruschenburger's Series of "First Books in Natural History"; Andrews and Stoddard's Latin Grammar; Arnold's First and Second Latin Books; Andrew's Latin Reader; Anthon's Cæsar, Sallust and Virgil; Crosby's Greek Grammar; Anthon's Greek Reader; Greek Testament.

---

## LITERARY SOCIETIES.

---

Two flourishing Literary Societies, the Franklin and the Adelphi, each of which has a pleasant and commodious hall for its weekly meetings, as well as a valuable and increasing Library, afford excellent opportunities for improvement in public speaking.

## MERIT ROLL.

---

A daily record is kept of each student's punctuality and the character of his recitations, a summary of which is sent to the parent or guardian at the close of each quarter.

---

## ROOMS.

---

1. Rooms can be obtained, in connection with board, in good families. Students desiring to room in College, are allowed their choice of unoccupied rooms, on application to the President.

2. Students are permitted to room only in College, or in the houses of private families, and must not change their rooms except by permission.

---

## TERMS AND EXAMINATIONS.

---

1. The Collegiate Year contains one session of nine months, which is divided into two terms. The first term begins on the first day of October, and the second on the fifteenth of February.

2. There is but one vacation, which embraces the months of July, August and September.

3. There are two examinations a year—one at Christmas, the other at the expiration of the session in June—when every student is required to undergo a thorough examination on the studies of the preceding term, and perform such other exercises as the Faculty may assign.

A committee is appointed annually by the Alabama Baptist State Convention to attend upon the examination in June.

## COMMENCEMENT AND DEGREES.

---

1. The Annual Commencement is held on the last Thursday in June.
2. No student is admitted to a Degree, or to any part in the Commencement Exercises, unless he has creditably sustained all his examinations, and performed such other exercises as may have been assigned him; nor until all College dues have been settled, and he has paid the Treasurer \$5 as a graduation fee.
3. Students who have completed the Scientific Course, receive, on the same conditions, the degree of Bachelor of Sciences.
